EXPERIENCE

Convert Digital

Junior Developer

March 2023 - Current

Techstack: React, Tailwind, Cypress, Ruby, PHP, NodeJS, Shopify

- Demonstrated proficiency in concurrently developing and maintaining code for 5-15 projects, ensuring code quality and adherence to best practices.
- Developed the ability to efficiently context-switch between working with external teams and onboarding work from other agencies.
- Skilled in adapting and working with diverse tech stacks, including at, Tailwind, Cypress, Ruby, PHP, NodeJS and Shopify Liquid.
- Successfully delivered projects within strict timeframes, identifying quick wins for clients and meeting key performance indicators (KPIs).
- Spearheaded a successful Searchspring integration, implementing a loyalty feature with Omneo, and creating intricate product swatches for various clients. I played a large role in developing reusable functions for our Cypress testing suite, streamlining testing processes. Additionally, I ensured our development practices aligned with WCAG2.2 guidelines, ensuring accessibility across projects.

Anchor Homes

December 2021 - December 2022

Building Designer

- Implemented an automation tool for window and automation tool that reduced documentation time by 5% & 9% on subsequent drawing revisions.

Henley Properties

March 2019 - December 2021

Architectural Draftsperson

- Consistently achieved 110% in KPI targets of producing working drawings and stakeholder management within my department of 18 people.
- Consistently worked on projects with 3+ people on a project concurrently.
- Daily liaising with internal stakeholders (estimators, engineers, admins and site supervisors) and external stakeholders (authorities, suppliers, tradespeople, contractors).
- Managed 15-20 projects concurrently, each with differing time-frames and budgets
- Developed an excel spreadsheet which allowed for commonly used calculations to be automatically generated and allowed for 2% reduction in the estimating process.
