PROJECTS

TakeStock

[Takestock Project Github](#)

Trello | Figma | Tailwind | HTML/CSS/Javascript | Ruby on Rails | Restful APIs

A platform that serves as an aggregator for social media, news and price charts to allow users to perform quicker market research.

Gearless

[Gearless Project Github](#)

HTML/CSS/Javascript | Ruby on Rails | Restful APIs | Heroku | AGILE

A marketplace application for outdoor gear rental/hiring. Allows users to create, book, rent their outdoor gear.

EXPERIENCE

Anchor Homes

Building Designer

December 2021 - December 2022

- Implemented an automation tool for window and automation tool that reduced documentation time by 5% & 9% on subsequent drawing revisions.

Henley Properties

Architectural Draftsperson

March 2019 - December 2021

- Consistently achieved 110% in KPI targets within my department of 18 people.
- Company of 300+ people (nationally and in APAC). Consistently worked on projects with 3+ people on a project concurrently.
- Daily liaising with internal stakeholders (estimators, engineers, admins and site supervisors) and external stakeholders (authorities, suppliers, tradespeople, contractors).
- Managed 15-20 projects concurrently, each with differing time-frames and budgets
- Developed an excel spreadsheet which allowed for commonly used calculations to be automatically generated and allowed for 2% reduction in the estimating process.

Earthlift Excavations

Drafting and Estimating

July 2018 - March 2018

- Implemented a drafting process that reduced drafting processes by 40%. The alleviation of resources allowed for a reduction of jobs being sent to contractors & allowing resources to be allocated to more big budget jobs.
